GATLA DURGESH REDDY

+91-9542508913 durgeshreddygatla@gmail.com www.linkedin.com/in/durgeshreddy-gatla-633932206

Summary

Seeking for an entry-level position in an organization where I can utilize my skills and educational background, passion for learning, and my dedication to contribute effectively to the company's success and further develop my professional skills capabilities.

Education

Bapatla Engineering College **2020 - 2024**
B.Tech - Data Science - ***CGPA: 8.46*** *Bapatla, Andhra Pradesh*

Narayana Junior College **2018 - 2020**
Intermediate [M.P.C.] - ***CGPA: 8.98*** *Vijayawada, Andhra Pradesh*

Ravindra Bharathi School **2017 - 2018**
Board of Secondary Education - ***CGPA: 9.5*** *Vijayawada, Andhra Pradesh*

Internships

Data Science Intern at *Oasis Infobyte Solutions Pvt. Ltd.* *[August 2023 - September 2023]*

Developed a car price prediction model using machine learning algorithms based on vehicle attributes such as mileage, cylinders, and gear type. Utilized Python and Scikit-Learn for model development and evaluation.

Data Analytics Virtual Internship at *Accenture (Forage)* – Virtual *[July 2023]*

Explored data analytics workflows, building foundational knowledge in data visualization and analytics using Python.

Artificial Intelligence Internship at *Spypro Security Solutions Pvt. Ltd.* *[May 2023 - June 2023]*

Developed CIFAR Object Regression Model with Deep Learning ,Machine Learning and Data Visualization Skills using Python.

Data Analytics Virtual Internship at *KPMG (Forage)* – Virtual [*February 2023 - July 2023]*

Gained exposure to data analysis and reduction techniques, focusing on real-world business data interpretation and reporting.

Projects

Milk Price Prediction Using Machine Learning **[***October 2024]*

Built a regression model to predict milk prices based on data such as weight, fat content, and volume from Dairy Farm records.

Crop Recommendation System **[***May 2024 - June 2024]*

Created a crop recommendation model using soil parameters (pH, Nitrogen, Potassium,Phosphorous,Temperature,rainfall and humidity) to advise on optimal crops based on local agricultural data.

Chronic Kidney Disease Classification **[***January 2024 - April 2024]*

Developed a classification model to predict Chronic Kidney Disease based on health indicators. Applied data preprocessing and machine learning for early detection.

CIFAR Object Regression Model *[May 2023 - June 2023]*

Developed a model to predict objects within an image, rather than just classifying the images into predefined categories. It is primarily used for image classification tasks.

Achievements & Certifications

- **Introduction to Programming Using Python** - Microsoft (MTA)
- **Data Analytics with Python** - NPTEL
- **Python for Data Science -** NPTEL
- **Python for Data Science** - Infosys Springboard
- **Deep Learning with Python** - Great Learning
- **Data Science & Analytics** - HP Life
- **Python Essentials 1** - Cisco Network Academy
- **Artificial Intelligence Fundamentals** - IBM Skills Build

- .

Technical Skills

- **Data Analysis**: Data Collection, Data Cleaning, Data Reduction,and Exploratory Data Analysis.
- **Data Visualization**: Power BI, Matplotlib, Seaborn, and Plotly
- **Machine Learning**: Regression, Classification,and Model Deployment
- **Languages** : Python, SQL, HTML and CSS.
- **Tools**: Scikit-Learn, Pandas, NumPy, and Heroku.

Languages and Hobbies

Languages : English and Telugu.

Hobbies : Playing cricket, and listening to music.

-
